Activity Book of Twists!

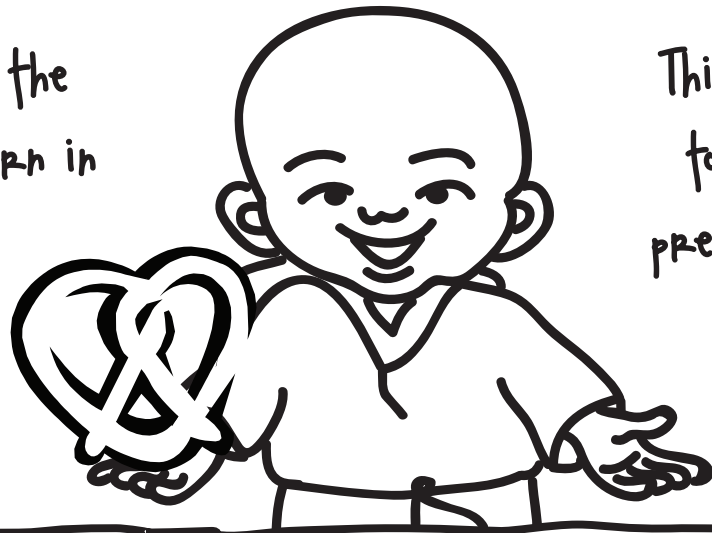

Welcome to
 Kim & Scott's
 Pretzel Bakery &
 Twisting Cafe...
 a magical place to eat,
 drink, twist, and play!

Spirit of the Pretzel

The spirit of the pretzel was born in 610 A.D.

This spirit lives today in our pretzel bakery!

The first pretzel was invented by an imaginative Italian monk. With ends of dough left over after making bread, he formed the strips to look like children's arms folded in prayer. After children did their chores, he gave it to them as a "little reward," called "pretiola" in Latin.

Twisted Idea!

Try folding your arms to form the twisted shape of a pretzel.

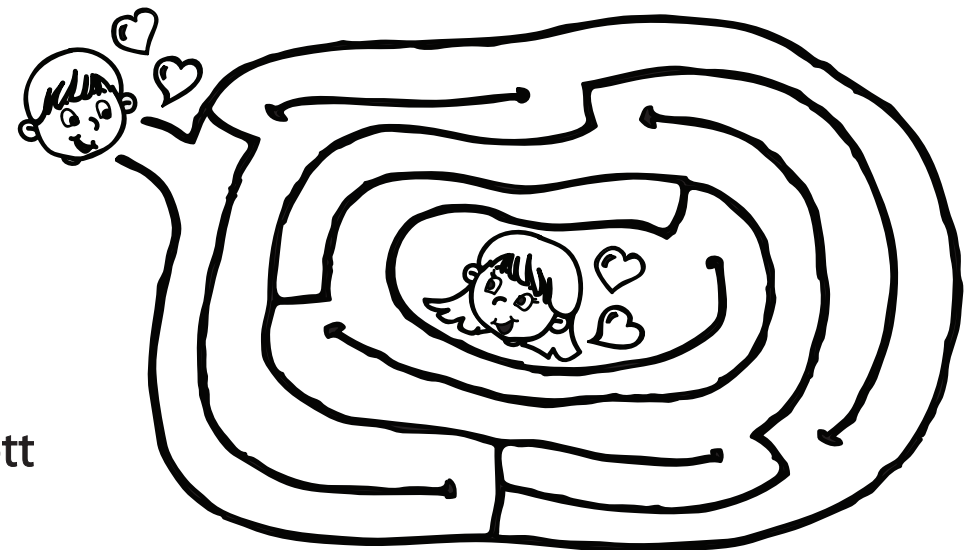

Twist of Fate

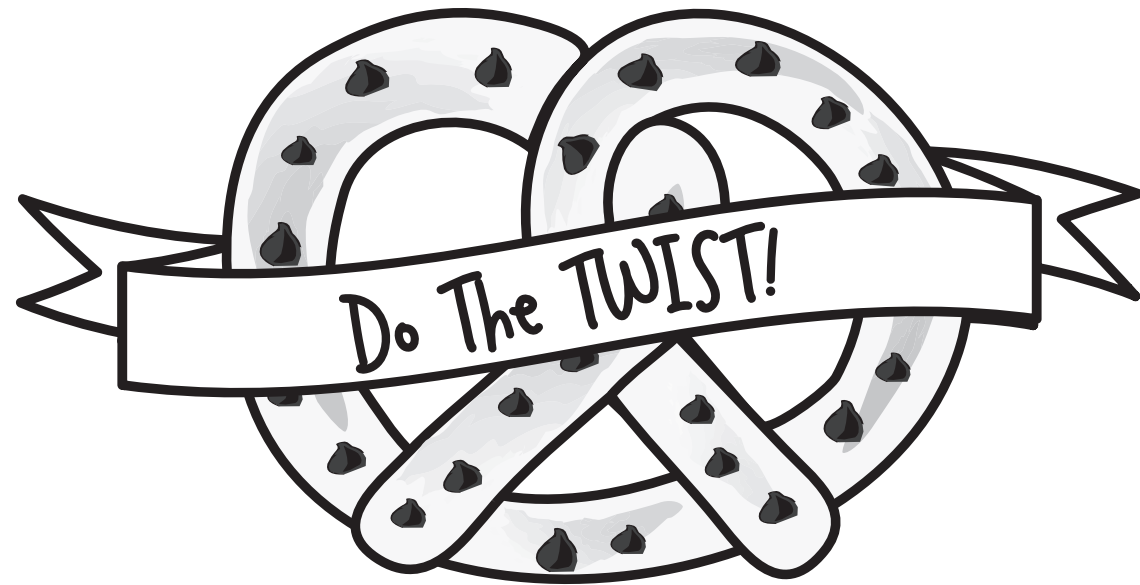

Kim and Scott met at a bookstore during a book signing by an author who writes about soulmates and airplanes.

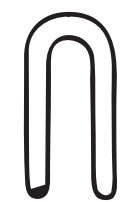

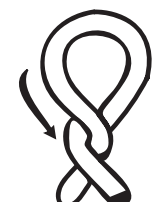

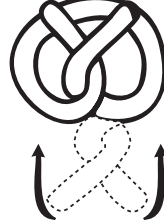

Twisted Idea!

Can you help Scott find Kim?

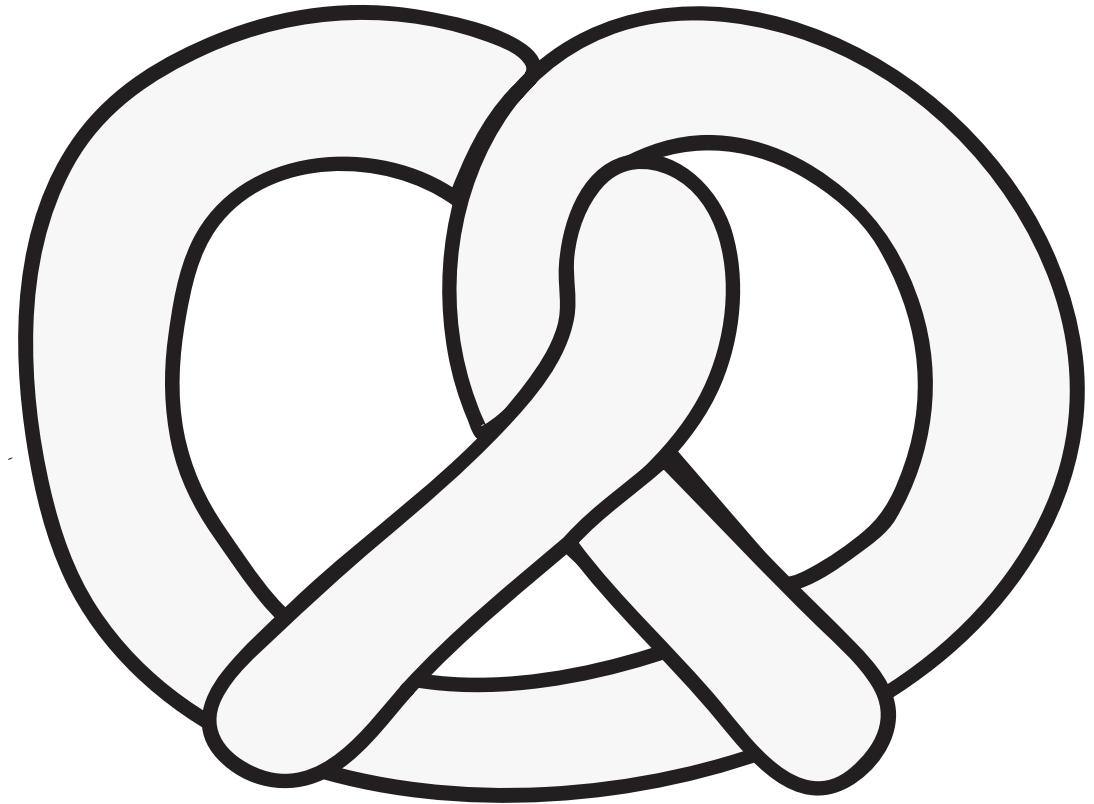

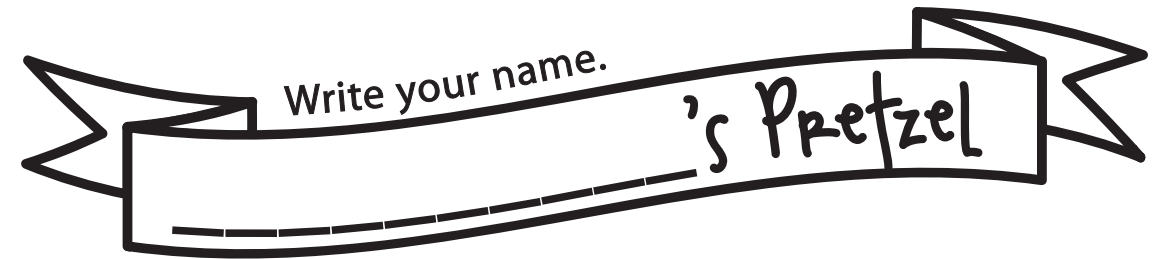

At the Twisting Cafe, children can create their very own pretzel. As part of the Twist 'N Top,[™] children twist, paint and decorate a pretzel using yummy toppings and coloring.

1.  Roll and swing the dough to stretch it out into a long strip.
2.  Make the shape of a jump rope or rainbow.
3.  Fold one side over to form a fish standing on its tail.
4.  Grab the ends and twist them over again.
5.  Fold the ends over the top. You made a pretzel!

Try these steps at home with play dough or real dough. You can do the TWIST!

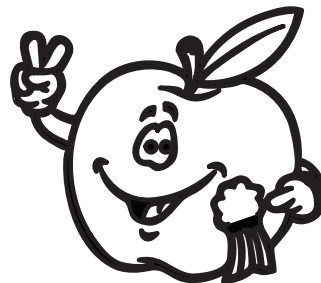

What would your own pretzel look like? Decorate this pretzel using the yummy decorations above and your imagination.

At Kim & Scott's Twisting Cafe we make our world a greener place to live by reducing waste, reusing what we can, and recycling things that can be made into new items.

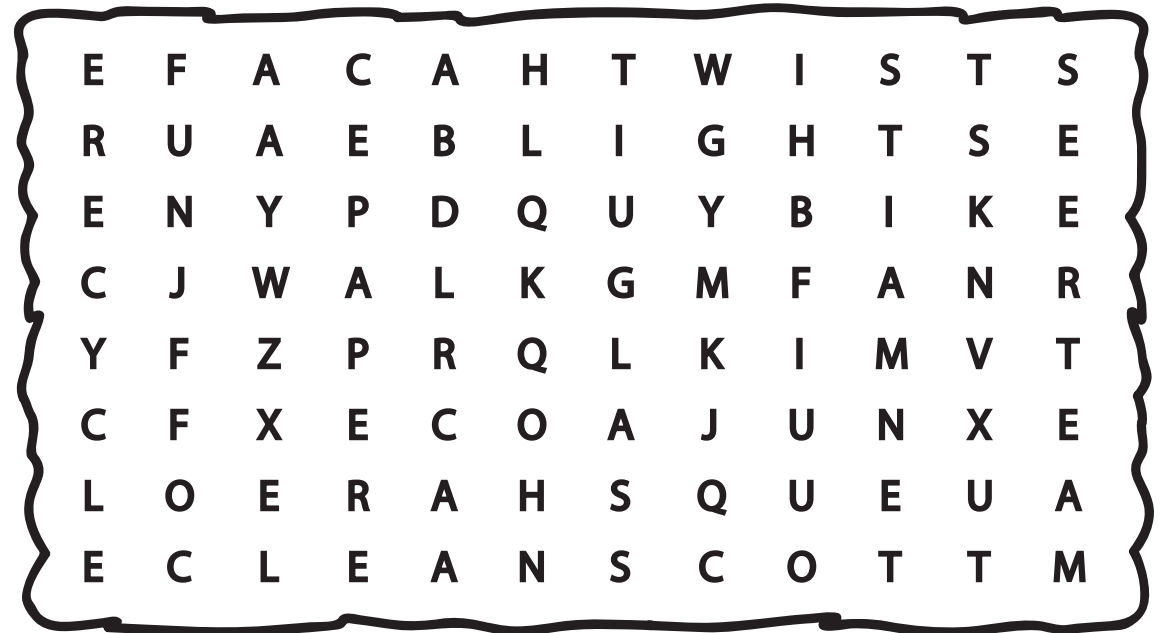

Kim & Scott's pretzels are made with all-natural ingredients. Kids need to eat healthy foods to grow up big and strong.
